DETAILED ACTION

1. This action is in response to the amendment filed 11/9/06.
2. Claims 1-21 remain pending and are being allowed.

Allowable Subject Matter

3. Claims 1-21 are allowed.
4. The following is an examiner's statement of reasons for allowance: The following claimed features are not shown or suggested by the prior art of record: The combined steps, in a method for generating code to perform anticipatory prefetching for data references, of:
 - analyzing the code to identify data references to be prefetched, wherein the data references are identified from basic blocks within if conditions regardless of whether the basic blocks are likely to execute, and wherein analyzing the code involves,
 - performing a first marking phase in which only data references located in blocks that are certain to execute are considered in determining which data references are covered by preceding data references, and
 - performing a second marking phase in which data references that are located in blocks that are not certain to execute are considered;
 - calculating a prefetch ahead distance, wherein the prefetch ahead distance indicates the number of loop iterations ahead to prefetch for. and wherein the prefetch

Art Unit: 2192

ahead distance is calculated as a function of loop characteristics within the code, as well as processor characteristics of the computer system; and

- wherein inserting prefetch instructions includes inserting multiple redundant prefetch instructions for a given data reference into unused instruction slots, and wherein executing multiple redundant prefetch instructions potentially avoids a cache miss.

These limitations are recited in each of independent claims 1, 8 and 15; thus, all remaining claims are also allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
